

ABOUT THE FOREST ACTION PLANS

Through the 2008 Farm Bill, Congress tasked the states and territories to craft assessments of the forests within their boundaries and develop strategies to address threats and improve forest health. The resulting Forest Action Plans provide an analysis of forest conditions and trends and delineate priority forest landscape areas.

ABOUT NASF

The National Association of State Foresters (NASF) is comprised of the directors of state and territorial forestry agencies and the District of Columbia.

NASF represents state and territorial forester interests by influencing forest policy and leading efforts to optimize social, economic, and environmental benefits of trees and forests.

Forest Action Plans: A Strategic Plan for the Nation's Forests

- The first-ever suite of Forest Action Plans was completed in 2010 by the 59 state/territorial forestry agencies. Each Forest Action Plan is unique to its state and **reflects significant public input, local expertise and the best available data on forest conditions.**
- Authorized by the forestry title of the 2008 Farm Bill, the Forest Action Plans are a crucial part of a national effort toward protecting and sustaining healthy forests and are focused on three national priorities: **Conserve working forest landscapes; protect forests from harm; enhance public benefits from trees and forests.**
- In 2015, every Forest Action Plan was carefully reviewed by the State Forester and a new national priorities section was added to the plans. A major report analyzing these national priority accomplishments and future challenges will be released this summer.
- **Forest Action Plans help target limited resources where they are needed most.** It is imperative that Forest Action Plans are explicitly considered, included, and supported in all relevant federal legislation, agency policies and agency work planning across all boundaries.
- Forests cover about one-third of the United States (751 million acres). Fifty-nine percent of this land is privately owned, and another nine percent is state-owned. These plans **leverage the power of local on-the-ground knowledge to achieve national results.**
- By focusing on all lands—state, private, and federal—and strategically assessing the forest areas that have the greatest need or highest value, we will get the most out of every dollar invested. The result will be healthier and more resilient landscapes, better and more fire-adapted communities, improved habitat, clean air and water, and a host of other public benefits that come from actively and sustainably managed forests.
- **Investing in and referring to the Forest Action Plans to protect forests is good for people, jobs and communities, now and in the future.**

Find your state's Forest Action Plan and the new national priorities sections at stateforesters.org www.forestactionplans.org.

The screenshot shows the website interface for the National Association of State Foresters. At the top, there is a navigation bar with links for 'ABOUT', 'CURRENT ISSUES', 'ACTION ISSUES', 'FOREST ACTION PLANS', 'SMOKEY BEAR', 'NEWS & EVENTS', 'JOB BOARD', and 'MEMBERS ONLY'. Below the navigation bar, the 'FOREST ACTION PLANS' section is highlighted, with sub-links for 'Nationwide', 'Regional & State', and 'About the Action Plans'. To the right, there is a 'REGIONAL & STATE MAP' showing the United States divided into three regions: West Region (green), Northeast Region (grey), and South Region (orange). A legend below the map identifies these regions. On the left side of the map, there is a sidebar with the text 'FOREST ACTION PLANS: GUIDELINES FOR FORESTS' and a 'FIND YOUR STATE' button.
