

July 28, 2020

The Honorable Mike Pompeo
Secretary of State
2201 C St. NW
Washington, DC 20520

The Honorable Eugene Scalia
Secretary of Labor
200 Constitution Avenue
Washington, DC 20210

The Honorable Chad F. Wolf
Acting Secretary of Homeland
Security
Washington, DC 20528

Dear Secretaries Pompeo, Scalia and Wolf

The undersigned organizations representing the \$300 billion¹ U.S. forest products economy seek your help to prevent the cascading economic and environmental impacts to working forests and rural communities resulting from the President's Proclamation "Suspending Entry of Aliens Who Present a Risk to the U.S. Labor Market Following the Coronavirus Outbreak" dated June 22, 2020. Suspending forestry H-2B visas will negatively impact rural forest communities around the country, millions of acres of public and privately owned forests, thousands of family forest landowners, timberland investments worth billions of dollars, and jeopardize the employment of thousands of American forestry workers.

Many H-2B employers contract their services to public and private forest landowners in the U.S. to perform forestry work. A major component of this work includes tree planting on more than 2.2 million acres of forestland annually that are both publicly and privately owned. A survey of businesses that employ H-2B forestry workers was undertaken in July 2020 to assess the impacts of the President's Proclamation, and revealed the following:

- **The suspension of H-2B forestry visas will have a harmful impact on 90% of the responding businesses.** Forty-five percent of respondents reported that they will not be able to do any of their planned forestry work. An additional 29% indicated that they would be able to do less than 50% of their planned forestry work.
- **Seedlings will go unplanted and die.** Nearly all replanting work in the U.S. is done by H-2B workers. H-2B forestry workers plant 1.55 billion tree seedlings on 2.2 million acres of forestland each year. If forestry is not granted an exemption allowing H-2B workers to begin this critical work in the next 60 days, an estimated 1.6 million acres of forestland will go unplanted, and 1.12 billion seedlings will die at a direct cost of \$336 million.
- **American companies and rural communities will suffer an estimated \$725 million in economic harm.** This includes the loss of seedlings, canceled contracts, and increased costs for future forest management operations when work resumes. It does not include the incalculable loss of billions of dollars in forestland value when a year's worth of timber growth is lost.
- **Labor for these jobs is extremely scarce or non-existent without the H-2B option.** Before receiving H-2B guest workers, businesses are required by law to advertise the available jobs to U.S. workers. Survey respondents stated that in FY2020, of the 6,350 positions advertised, the number of local workers who applied for these forestry jobs was only 1.9% of the available positions.
- **American jobs depend on the work done by these guest workers.** Each H-2B worker supports 4.5 American jobs.² Further, a recent Government Accountability Office study concludes that "*counties with*

H-2B employers generally had lower unemployment rates and higher average weekly wages than counties that do not have any H-2B employers”.³

The role H-2B workers play is unique, critical, and essential for the regeneration, retention, and long-term environmental and economic value of America’s public and private forestlands. The work they do is seasonal, performed outdoors with exposure to various weather conditions and terrain, and often requires travel from state to state throughout the planting season, separating workers from their families for months at a time. It is also critical to supporting the 2.5 million full-time jobs held by non-H2B workers along the forestry supply chain.

As the State Department reviews the proclamation, the signatories of this letter respectfully urge you to add forestry related services to the National Interest Exceptions to the Presidential Proclamation suspending the entry of nonimmigrants to the United States. Failure to do so will negatively impact small businesses and rural forest-dependent communities across America.

Thank you for your consideration of this important issue to the forest products sector of the United States.

Sincerely,

Deb Hawkinson
